

The motivation letter

Dear sir,

I am putting forward my motivation letter for you, to make general idea about me and my concern about getting the scholarship.

My name is UWITONZE Liliose and I'm 23 years old. I have advanced diploma(A2) in Masonry at Don Bosco Kabarondo one of the technical school in Rwanda. Well, helping other in construction idea belongs to my hobbies too. What can be more pleasant than joining hobby and duty together?

The idea about making attempt to get some scholarship has been in my eye since I have seen the Bildungsbrücke -Ruanda scholarship posted on its website. But a day ago my colleague told me about this opportunity and I started to wonder about this more concretely.

My temper is naturally curious and adventurous so the fact that the destination is in the area of The Rulindo district near Kigali city in Rwanda pleasant for me. Moreover, there is another aspect I'd like to point out. Let's imagine, I would be offered one scholarship to study Land survey at INES-RUHENGERI located at MUSANZE District in Northern province where I will be hosted during my study if I get offered.

As mentioned above my interests lays in cultural and social spheres too. In my opinion, the main gain for a student who get a scholarship, shouldn't be the studium itself. Discovering habits and ways of living of various people is the way how to make a detached view on the society. So the answer to the question „What do I expect“ is clear. Of course I'm not saying I don't want to get new skills on the field of my academic aim. I'm quite a lot interested in land survey so this is an ideal way for my knowledge to be widen. What's more, I believe I could be a benefit for the other students too. It depends on the level of the contact with them. And I believe that your kindness will make my wish come true.

Best regards,

UWITONZE Liliose
